

Council Minutes

2026-07-08 • The Handover Session

Convened: Landis (Keeper, departing) & Cinco (Council of Un, seated)

Present: Taxe (player), Montgomery (Backup Science), Daniels (Botany, Depot), Keely (Hoffan Liaison), Rainbow (Armory), Koyla (Genii Liaison), Radek (Pinned to Genii Compound)

Recorded by: The water, via Fen (Landis)

Part I — Standing Orders Transfer & Narrow Table Ratification

Action: Landis formally transferred SO-1 and SO-3 (Chain of Command, Works & Projects) to Cinco, seated as Un (the Council).

Ruling — SO-1.1a, Who Sits:

Unanimous. The Council elects the **narrow table** — only the seated Council votes. Heads advise and report, but do not hold a vote. Vote remained with Cinco (Un) throughout this session and all recorded decisions herein.

Rationale (Cinco's stated): Consolidate power now; summon heads at need; avoid chaos.

Part II — Directives & Assignments

Directive 1: The Courier Department (First Active Record)

Moved by: Cinco

Status: Passed unanimously, **on record** (Cinco's stated "first active record")

Terms:

- **Head:** COURIER ONE (office-title; name survives succession — the next deputy becomes COURIER ONE)
- **Deputy:** Dave (formal: David; informal: Davey)
- **Complement:** +8 additional deputies (granted by Landis on departure)
- **Function:** Couriers/runners bear written letters between departments and wards

Directive 2: Designate Head Torture Officer

Moved by: Landis (compromise proposal), **accepted by:** Cinco

Status: Passed unanimously, **by record**

Assignment: Rainbow → Head Torture Officer (a title under Armory, not a new department)

Directive 3: Second-in-Command

Moved by: Cinco

Status: Passed unanimously, by record

Assignment: Daniels (Botany, Depot) → second-in-command (Cinco's personal advisor; primary point of escalation)

Part III — Works Commissioned & Advanced

Work 1: Rainbow Learns to Torture (Small Work, 1 Watch)

Moved by: Cinco

Hands: Rainbow (pinned)

Stakes: Wraith's willingness to teach / to be tortured

Method: Medieval research (books, implements, theory; not yet in practice)

Status: Commissioned, no squall, unblocked by Wraith availability

Note: This is research phase. Wraith not required to progress. Hands are tied until Rainbow reaches watch 1/1 and the card advances.

Work Order 1: Daniels' Standing with Child-World Elders (Work Order, 3 Watches)

Moved by: Cinco

Handed to: Daniels (Botany)

Mission: Build Standing with the child-world elders via diplomacy and cultural exchange

Method: Bring space weed; befriend the elders (population described as "kids who killed themselves at 25")

Recruitment: Bring Dionysus (child-world elder) into Botany as junior recruit

Staging: Cinco accompanies on the third watch

Status: Commissioned; unblocked

Work 2: The Catch (Work, 3 Watches, 18-hour clock active)

Status: Ongoing from prior session; session summary:

Objective: Capture a Wraith for interrogation and research.

Site: Child-world (beacon return).

Plan:

1. Return to child-world; deploy beacon

2. Wait for Wraith hive response
3. Activate EMP (shield generator, from prior session)
4. Wraith fall from sky; stun with tranquilizer guns (5 guns available; stun guns ineffective through EMP)
5. Capture ~1 prisoner; dispatch remainder if overwhelmed

Squall status: NO SQUALL (Keeper's telegraph). Capture is guaranteed by house rules. Only risk: "unless they suck out someone's soul" (Wraith-specific threat, not a mechanical fail).

Card hands: Pending roster finalization.

Work 3: Jumper Three Repair & Recovery (Concurrent with The Catch, 1 Watch)

Objective: Recover and repair damaged Jumper #3 from child-world.

Hands: Montgomery (Backup Science) + two soldiers (selected by Major Lorne: the "dumbest and the smartest")

Method: On foot (non-combat escort). Concurrent with The Catch (simultaneous operations, same site).

Note: Montgomery can perform emergency repairs; Radek (pinned to Genii) will need to oversee full rebuild upon return.

Work 4: Operation - Get the Wraith High (Floated, not committed, ~1 Watch if taken)

Status: Deliberately held open; player ("Cinco") explicitly kept "in the air"

Proposal: Hotbox the captured Wraith (drug interrogation). Frames as part of torture methodology. Cinco blamed sleep-deprivation for the pitch.

Keeper note: This is a backup option if time allows and Cinco commits. Not on the active board unless chosen.

Part IV — Squalls Opened & Resources Moved

Squall: The Shield's Heart

Trigger: Montgomery delivered the ZPM-recovery report.

Open status: OPEN (per Keeper seal).

Description: ZPM recovered from child-world generator. Intelligence disappointed — device is not what was hoped (Radek to assess full details).

Resource movement:

- Child-world Standing already spent (not risked this session); recovery on next return
 - ZPM radioed home (command aware)
 - Radek pinned to Genii Compound (did not attend this conference; kept remote via radio)
-

Part V — Standing & Diplomatic Status

No Standing votes taken this session. Per narrow-table ruling, Standing is held by the Council and managed by Directive. The following remain **active/live**:

- **Hoffan Compound:** Ongoing research; awaits test subject (Wraith) for vaccine trials. Beckett: will work with dead Wraith; refuses live test on ethical grounds.
 - **Project Hammer:** Blocked on Wraith interrogation intel (where will the device be deployed?). Genii will not commit until Wraith confesses location.
 - **Child-world (Childhood's End):** Standing spent this session; will rebuild via Daniels' space-weed diplomacy (next push).
 - **Genii:** Diplomatic relationship TBD (Koyla attending as liaison; Radek pinned; Colm status: **unresolved**, held open by Keeper).
-

Part VI — Keeper's Departure & Handoff Notes

Landis departed on the Silver Surfer at the end of this session (in-fiction end of 18-hour watch).

Handoff to Cinco (Un): Standing Orders binder, authority to commission Works and Directives, seal of the narrow table, +8 couriers.

Open threads passed to next session:

- Whether the water answers Cinco (Landis deferred to next watch)
 - Colm's status (believed dead / alive and rogue — Keeper holds open)
 - Omar's status (Keeper-sensitive; ascension arc TBD)
 - Wraith interrogation (pending capture, The Catch Watch 1/3)
-

Appendix — Minutes Format & Future Sessions

The Minute (house standard, going forward):

- One line per vote, override, or Directive
- Who decided, what was decided, who dissented (if any)
- No narrative narration; just record

Full Minutes (as above):

- Produced after major sessions (handovers, major votes, Work completions)
- Appended to `Council_Minutes.md` in the project repo
- Keeper-approved before being added to the record

Voice: Written in the past tense, formal register, signed by the Keeper or their proxy (Fen).

*Recorded in full by Landis Fishman, Keeper of the Council of Un, on the watch of departure.
To be filed with the archive and the canon ledger. The pen is mightier than the die.*
